

LABELERS

TOP/BOTTOM

SERIES

The Top/Bottom Labeler is a system designed to apply pressure sensitive labels to the top and/or bottom panels of flexible or rigid products or containers. A height adjustable post allows it to label products from empty bags to full boxes. All-Fill labeling equipment has a variety of options including semi-automatic and automatic machines, featuring touch panel controls for quick and easy changeovers. There are also economical Top/Bottom Labelers that are designed for limited volume production lines or start-up operations. We reduce the need for change parts with an open frame design that features a fully adjustable and versatile machine.

STANDARD FEATURES

- Stepping motor drive with color touch panel controls for ease of set-up
- Conveyor options include dual conveyor and side-mounted hugger belts
- Scaled head post for easy adjustment of applicator height

AVAILABLE OPTIONS

- Semi-automatic and automatic options
- Clear label sensor, required for transparent labels
- Fixed and variable speed conveyors

- Lead screw adjustment with scales for the in and out position of the labeling head
- Complete alarm package to include end of web, low label, and broken web. Also available a missing label on web alarm
- A variety of date lot coders
- Inspection station and reject systems
- Print & apply packages available
- Many other options available
